

D005198 Extension Adapter

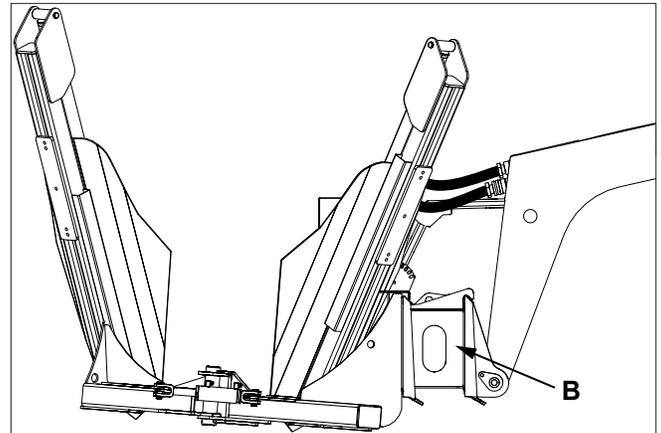

Before purchasing the ST440 Tree Spade, measure your skidsteer to see if the D005198 Extension Adapter is required.

The lift arm design on some skidsteers may result in the tree spade contacting the hydraulic couplers when the tree spade is fully rolled back.

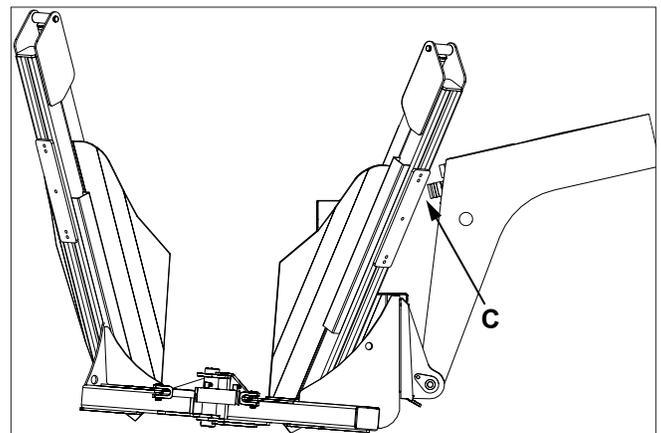

The distance (A) between the hydraulic couplers and the skidsteer quick attach plate should be at least 15.79 in. (401 mm).

If distance (A) is less than 15.79 in. (401 mm), Extension Adaptor D005198 (B) is needed to avoid tree spade interference with the hydraulic couplers at (C).
